ClayLime[®]
Coating from Nature

100% Natural Clay & Lime Plasters

ClayLime is a Producer of top-of-the-range natural decorative coatings.

The Natural coatings, Claystone, Creatina, Monosoft and TadelaktPro, impart unmatched elegance and resistance to all types of surfaces, floors, interior and exterior walls, furniture, bathrooms and walk-in shower's walls. For over 10 years, these natural and innovative products have demonstrated superb & consistent performances. The natural coating systems Claystone, Creatina, Monosoft and TadelaktPro are manufactured and commercialized under an exclusive license granted by C.H. Gernaert (sole owner of the products rights). The ClayLime coatings are available in more than 10 countries through a network of distributors and partners who share the same values as ClayLime.

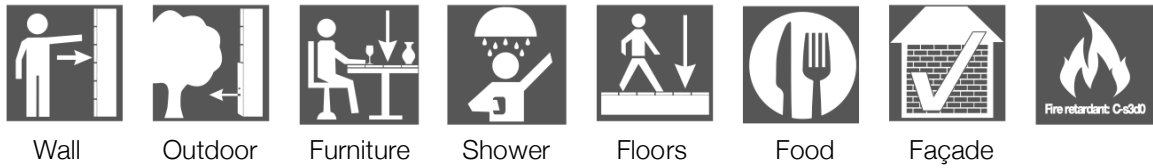

THE SPIRIT OF

The spirit of ClayLime is rooted in nature, respect and integrity. It embodies a set of beliefs which underpin everything we do:

- ✓ Respect for nature and the environment.
 - ✓ Belief in natural building practice.
 - ✓ Creativity and innovation.
- ✓ Appreciation of ancient, vernacular building methods and traditions.
 - ✓ Working with likeminded individuals and companies.
- ✓ We believe in creating a positive company. One that inspires others, respects communities, the environment and the end user.

Claystone®

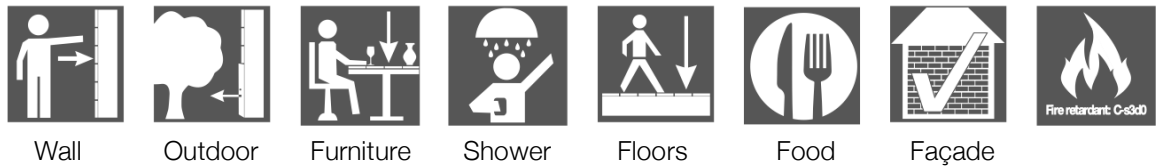

Claystone for floors and walls, the natural and permanent alternative to cement. Claystone is a very hardwearing coating based on clay and sedimentary rocks, VOC-free, and is ideal for covering interior floors, interior and exterior walls and worktops.

The advantages of the Claystone clay-based coating:

- Natural VOC-free clay-based coating
 - Natural stone or smooth finish
- Very solid and hard-wearing for use on floors and walls
- Easy to apply, without the disadvantages of cement
 - Microporous, allowing passage of air
 - Can be used on top of tiled surfaces
- Can be rendered stain-resistant and waterproof

Creatina[®]

Creatina, a coating with a wide variety of finishes, very soft to the touch, has a matchless classical beauty. It provides the most versatile solution for decorating or giving a completely new elegant look to walls, floors, showers and pieces of furniture.

The advantages of the Creatina limestone coating:

- Natural VOC-free coating based on powdered limestone
- Endless possibilities for finishing textures and colours
 - Easy to apply with roller, brush or spatula
 - For use on any substrate, even flexible ones
- May be rendered stain-resistant and waterproof
- Can be used on top of tiled surfaces and in showers

TadelaktPro™

Wall

Outdoor

Furniture

Shower

Floors

Food

Façade

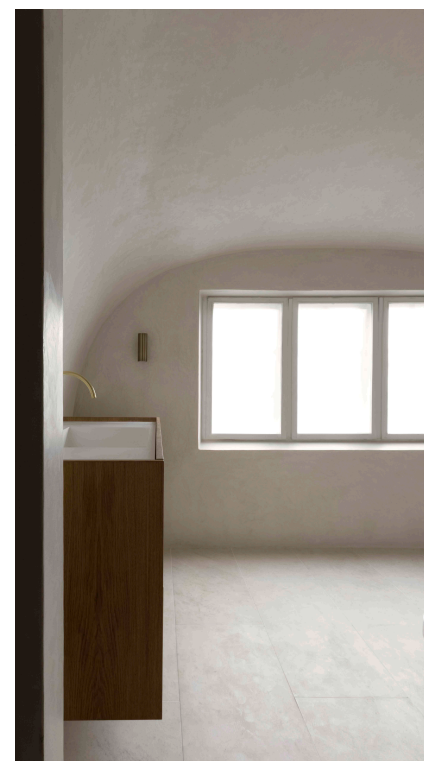

Fire retardant: C-s3d0

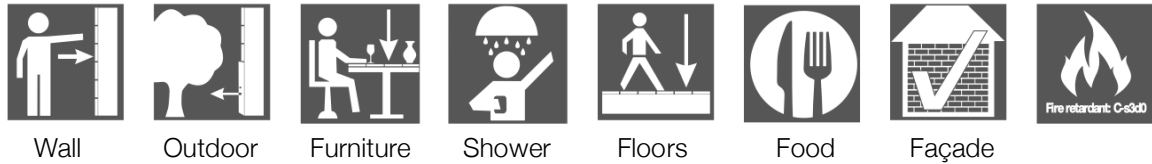

TadelaktPro™ by ClayLime® is a product that combines tradition and technology, inspired by an age-old oriental technique. This ecological lime coating acts as a fungicide and a natural humidity and temperature regulator, giving a smooth, warm rendering with silky colours. The coating par excellence for water features. Apply by a professional and very durable, TadelaktPro™ places the most prestigious finishes within the reach of your home interior.

The advantages of TadelaktPro

- Ecological limestone-based coating
- Results exactly the same as Moroccan tadelakt
 - Far easier to use
- Silky, warm and sensual to the touch
 - Waterproof, ideal for wet rooms
- Can be applied to any stable substrate on floors and walls

MonoSoft®

d

lime with a diluted polymer binder that gives it all its refined appearance with limited effects, as well as high resistance.

MonoSoft is an innovative plaster and accessible to all. It transcends the refined elegance of its rendering for any type of surface to be covered or renovated. As a result of ClayLime's years of experience and research in waxed concrete, the MonoSoft, with its smooth and soft appearance, is 'the' easy and effective solution for transforming any interior at a lower cost.

The advantages of MonoSoft natural plaster

- Natural coating, without VOC
 - Very smooth and soft appearance with little effect
- Very easy to apply with a trowel in one single layer of max 2mm thick
- Allows to be worked without 'burning' the surface until the desired effect is obtained
 - Available in water and stain-resistant version
- Can be used on tiled surface and on shower walls
